Bridging China & the World
国际交流的桥梁

Triway Enterprise, Inc.

Triway Enterprise, Inc. was incorporated in 1993. We provide professional training programs designed for Chinese delegations in the U.S. During the past 14 year, the company has hosted thousands of government officials and business leaders from China and created for them tailored training programs in various fields. Many of them today assume important posts at various levels of government and corporate management. They not only learned the knowledge and expertise in the technical fields, but also gained better understanding of the American culture and people.

We help American travelers in China too...

What we do helps enhance the mutual understanding between people of China and the United States.

Knowledge is power. We believe that the knowledge gained through people to people visit has mighty power in building a better world.
